

# COACH TRAINING OUTLINE

The purpose of **SPEECHified Coach Training** is to improve developmental outcomes for preschool-aged children by supporting speech-language pathologists (SLPs) and their intervention team members in becoming better parent coaches. This is accomplished through:

- Facilitating meaningful, efficient, skill-building exercises and discussions
- Providing a parent capacity-building framework, and
- Teaching and supporting patterns of self-analysis and self-improvement that help professionals continue to improve their parent coaching skills after formal SPEECHified training is complete.

## Program Components

The program is made up of three modules. Each module contains one of the following components:

- Group learning session
- Home learning opportunity and
- Participation in a parent session
